EDUCATION

University of Maryland, Baltimore County

M.S. in Cybersecurity | GPA: 4.0 — 12/2027

B.S. in Computer Science | GPA: 3.77 — 12/2025

EXPERIENCE

IT Intern at Fuchs North America — 08/2025 - Current

- Secured Microsoft Active Directory by implementing Group Policy security baselines and hardening authentication protocols & network communications
- Installed and configured a Veeam immutable backup repository, documented the setup & data recovery processes, and developed an operational runbook to support disaster recovery
- Build, install, & configure workstations & servers, including RAID storage & iSCSI-connected infrastructure
- Troubleshot camera connectivity issues
- Performed security reviews using Rapid7, Wireshark, and various vulnerability scanners to identify, investigate, & remediate security configuration issues
- Managed network infrastructure such as switch configurations & WiFi site surveys
- Designed and built Power BI dashboards that connect data from both legacy and new ERP systems to help teams spot trends, check data accuracy, and make informed decisions at line, management, and executive levels

Teaching Fellow at UMBC — 01/2025 - 12/2025

- Assisted students with debugging their C++ code, including problem-solving & checking for edge cases

PROJECTS

- Placed 80th in the SentinelOne Sentinels League Threat Hunting World Championship 2026 Americas Regional Finals, performing time-constrained threat hunting across endpoint/EDR telemetry using SentinelOne Singularity
- Configured a virtual pfSense firewall to use Split DNS, log forwarding, & allow OpenVPN access to a DMZ
- Developed YARA rules based on entropy analysis, imported functions, and string matching to identify a variety of malware with a 90% F1 score
- Performed a penetration test against 4 isolated machines using various tools. Authored a security report and a findings presentation that communicated both high-level & technical results
- Reverse engineered a malicious binary and implemented the functionality of the C2 server based on observed communication patterns
